Pedicure and Manicure Cleaning & Disinfecting

Pedicures:

- 1. The pedicure footbath area is to be washed, rinsed, sanitized and dried after each use.**
- 2. Reusable items such as towels cannot be reused without washing and drying on high heat or single use towels can be used and discarded after each use.**

Nails:

- 1. All manicurists shall wash their hands thoroughly before and after rendering service to any customer.**
- 2. Durable metal equipment such as clippers, nippers, cuticle pushers and scissors must be washed and sanitized before using again.**
- 3. Porous and non-durable items such as buffers, soft files and wooden sticks cannot be sterilized. These must be discarded after each customer, given to the customer to take home or can be stored in a small container to be used only by that customer and will be labeled for that customer.**

Please call the Halifax Board of Health with any concerns.
